HOSTEL MANAGEMENT SYSTEM

TEST SUMMARY REPORT

Quaid-i-Azam University

Software Testing Documentation

Report status

This report summarizes the prepared performance, security, system, unit, and user acceptance test plans. No test execution evidence or measured results were supplied. The counts below represent planned test cases, not tests run or passed. Overall status: PENDING EXECUTION.

Document control

Field	Details
Version / date	1.0 | 26 October 2026
Project	Hostel Management System
Institution	Quaid-i-Azam University
Summary scope	Five testing levels; planned test cases consolidated in the test plan
Overall result	Pending: execution, defect review, and acceptance sign-off not recorded

Executive summary

A consolidated plan has been prepared for the main hostel management workflows: accounts and dashboards, hostel applications, room and bed allotment, complaints, fees, visitors, notices, and reports. The next step is to confirm requirements, environment, roles, and acceptance thresholds, then execute the cases and record evidence. Until that work is complete, the system has no test pass/fail determination in this summary.

1. Planned Test Coverage

Test level	Planned cases	Execution status	Evidence / result
Performance testing	16 (PT-01 to PT-16)	Not run	No load-test output supplied
Security testing	18 (ST-01 to ST-18)	Not run	No security execution evidence supplied
System testing	18 (SYS test cases ST-01 to ST-18)	Not run	No system test results supplied
Unit testing	18 (UT-01 to UT-18)	Not run	No source or unit-test output supplied
User acceptance testing	18 (UAT-01 to UAT-18)	Not run	No participant results or sign-off supplied
Total	88	Not run	Planned cases only

Note: identifiers are specific to their individual reports and can repeat across test levels. Use the report title together with the case ID when recording findings.

2. Results Snapshot

Measure	Recorded value
Test cases planned	88
Test cases executed	Not reported
Passed / failed / blocked	Not reported
Defects opened / closed	Not reported
Performance measurements	Not reported
Security findings	Not reported
UAT acceptance decision	Pending

3. Environment and Run Record

Item	Complete during execution
Build / commit and deployment	_____
Environment, database, and test tools	_____
Test dates and responsible testers	_____
Test data and reset/backup method	_____
Approved requirements and thresholds	_____

4. Findings and Risks

No findings can be reported until tests are executed. The following items are open planning dependencies rather than observed defects: confirm the actual application build and environment; map proposed cases to documented requirements; agree performance targets and security severity rules; prepare role-based test accounts and synthetic data; and assign business representatives for UAT.

Finding ID	Observed issue / evidence	Severity	Owner	Status
To be assigned	Complete after test execution	TBD	TBD	Open
To be assigned	Add a separate row for each distinct finding	TBD	TBD	Open

5. Overall Assessment

Current assessment: PENDING. The available materials define planned test activities but do not include executed results, measured performance, verified security controls, defect disposition, or user acceptance. A release recommendation should be made only after the agreed cases are run against the identified build and the responsible project and business owners review the evidence.

6. Recommended Completion Steps

• Confirm the planned scenarios and expected outcomes against approved project requirements.

• Record the target build, environment, tools, test data, roles, and test owners.

• Execute each applicable case and retain reproducible evidence; mark blocked or not applicable cases with a reason.

• Triage defects, correct issues, and record retest outcomes.

• Complete the performance measurement and security finding sections using actual data.

• Have the responsible business owner record the UAT decision and authorized sign-off.

7. Sign-off

Role	Name	Decision / signature / date
Test lead	_____	_____
Project supervisor	_____	_____
Business owner / approver	_____	_____
