Notice Model

Software Requirements / Logical Data Model

1. Purpose

Represents an announcement published for students or hostel users.

2. Responsibilities

• Store notice content and publishing metadata.

• Identify the intended audience, if audience targeting is supported.

• Support display of current notices to authorized users.

3. Proposed Logical Attributes

The following is a documentation proposal, not a claim that every field is already implemented. Confirm exact field names, types, constraints and cardinalities against the project ERD/database schema.

Attribute	Meaning / Requirement
notice_id	Unique notice identifier.
title	Short notice heading.
body	Notice content.
published_by	Authoring staff/account reference, if recorded.
published_at	Publication date/time, if recorded.
status	Draft, published, archived or other defined state.
expiry_date	Optional date after which the notice should no longer be shown.

4. Relationships

• A notice may be created by an authorized staff account.

• Notices may be displayed to students or other defined user groups.

5. Validation and Business Rules

• Only authorized roles may publish or edit notices.

• Published notices should have valid titles and content.

• If expiry is supported, expired notices should not appear as current notices.

• Changes to important notices may be logged.

6. Traceability / Notes

Online notice publishing is included in the stated project scope.

Status: Draft for review. Align this document with the approved SRS, ERD, class diagram, and institutional policies before treating it as final.
